SPRING NEWS, PROJECTS & STORIES

With spring finally here, we've been photographing finished projects, including a wonderful rural home in Argyll and Bute.

Also featured are Tom Robinson's observations from a hands-on course he attended to feed his passion for Conservation Architecture. Preserving great heritage buildings is part of the DNA of Thomas Robinson Architects.

PRESERVING OUR HERITAGE BUILDINGS

Conservation architecture is a keystone of our practice. Tom has been topping up his expertise with hands-on courses in lime pointing and a fascinating RIBA course on conservation strategies. [Read more on our blog.](#)

BUILDING HOLIDAY HOMES

We've seen an increase in people wanting to build holiday accommodation recently, from [Airbnb extensions](#) to fully fledged [shooting lodges](#). Do contact us if you're looking to renovate or build a property or extension to let to the holiday market.

THE WONDERFUL WORLD OF COMPUTER MODELLING

You may not have heard of BIM (Building Information Modelling), but for us architects computer-aided 3D design is constantly on the verge of new frontiers, not least the weird and wonderful worlds of Virtual Reality and AI.

A NEW RURAL HOME WITH A DIFFERENCE

One of our most enjoyable projects has been a successful, sustainable new large family home in the grounds of listed Knockderry House Hotel in Argyll and Bute, with interesting design nods to the unusual historic hotel. [Have a look at the results and read more here.](#)

Got a building idea? [Contact Thomas Robinson Architects](#) for everything from extensions to new homes, or conservation work on an old building. We're always interested in your ideas.
